

Leaders in Energy Transition

This is us

Professionals with deep roots in the market

Message from the Ceo

“

Our mission, at FVG Renewables, is to bridge the gap between capital markets and local solar developers, acting as an accelerator of the PV industry. On this journey, we are guided by a well-rounded, focused and clear approach to sustainability. And we never forget our central responsibility: we have promised the next generation a greener future and we owe it to them to deliver on those promises. In full. On time. No excuses.

Our variegated team has many different skills and day in day out, we all live and work by a core set of values. But above all, there is one simple principle: we take care of each other, as we take care of our planet.

**Welcome to FVG.
Welcome to our Greener World**

”

Andrea Moro
CEO, FVG Renewables

FVG Renewables is a renewable energy developer, headquartered in Italy. We focus on developing best-in-class renewable energy power plants in Italy.

Our vision is to contribute towards providing meaningful and viable solutions to preserve and protect the environment.

Our mission is to develop technologies allowing public and private entities achieving a net-zero carbon footprint and helping them transitioning to a sustainable, pollution-free economy. We believe that details are everything and exceeding the expectations is the only way to operate. That is why FVG Renewables can avail itself of a strong international network in any sector: finance, engineering, development, EPCM.

To guide our path, we are mentored by a prestigious Steering Committee: 4 renowned professionals whose backgrounds and areas of expertise are perfectly balanced, in order to guarantee the highest quality of consultancy and counseling throughout all the process.

Strict ESG commitments, calibrated on major corporations and asset management firms, determine the core principles around which our business is built: sustainability, diversity, care.

Our Values

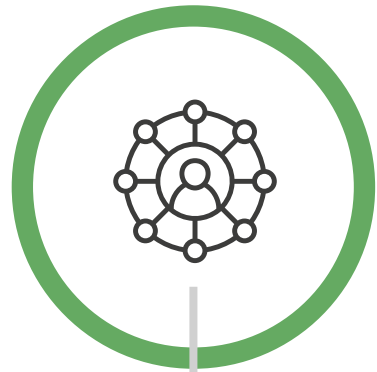

What We Stand For

As a leader in sustainable green energy projects globally for the benefit of people, profit and planet, we are a reflection of our values. In FVG Renewables, we are driven by a deep sense of purpose to create a sustainable future for the generations to come by harnessing the power of renewables. As a global solar energy developer and operator, we recognize the immense responsibility that we have in the transition towards a low-carbon economy, and we are strongly committed in investing in innovation and technological advancements to deliver best-in-class power plants. Our company is growing and evolving, but our commitment to make a positive impact on the environment and the communities we serve, remains unchanged.

Creativity

We think big and creatively, solving the complex problems in solar to fund, develop and scale solutions that work.

Cooperation

Quality communication across multifunctional channels with partners, customers, and regulators, makes us a pleasure to work with.

Commitment

We see things through from start to finish, applying our experience to guide our process to execute on projects swiftly and efficiently.

Integrity

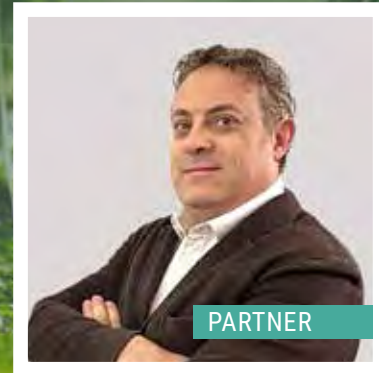

Rooted in sustainability, we prioritize honesty and transparency. Our decisions are driven by desirable outcomes for all.

Why FVG Renewables?

More than a hundred years (in aggregate) of business development experience over four continents.

Project Development

FVG leverages on trusted partnerships with tier-1 international players in order to deploy top-notch development solutions rapidly and effectively, with a particular attention to details in every phase of the project and an accurate resource allocation strategy, in order to deliver the best results, right on time.

Consultancy

We employ innovative approaches and highly skilled people to enhance project development, delivering sustainable business growth through the design and implementation of business processes based on best practices, solid strategy and innovative technology solutions.

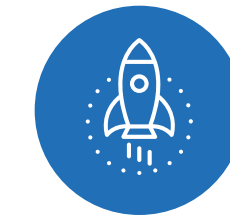

Direct Investments

Our diverse and deep industry network uniquely positions us to identify and evaluate investment opportunities within the renewable energy sector.

Financial Expertise

Our background in asset based structured infrastructure allows us to provide sound solutions for the financing of our assets.

Innovation & Technology

Focus on the latest findings in the renewable industry. In particular, we are developing a new core business around (i) BESS Storage, (ii) Green Hydrogen and (iii) Co-Located PV and BESS.

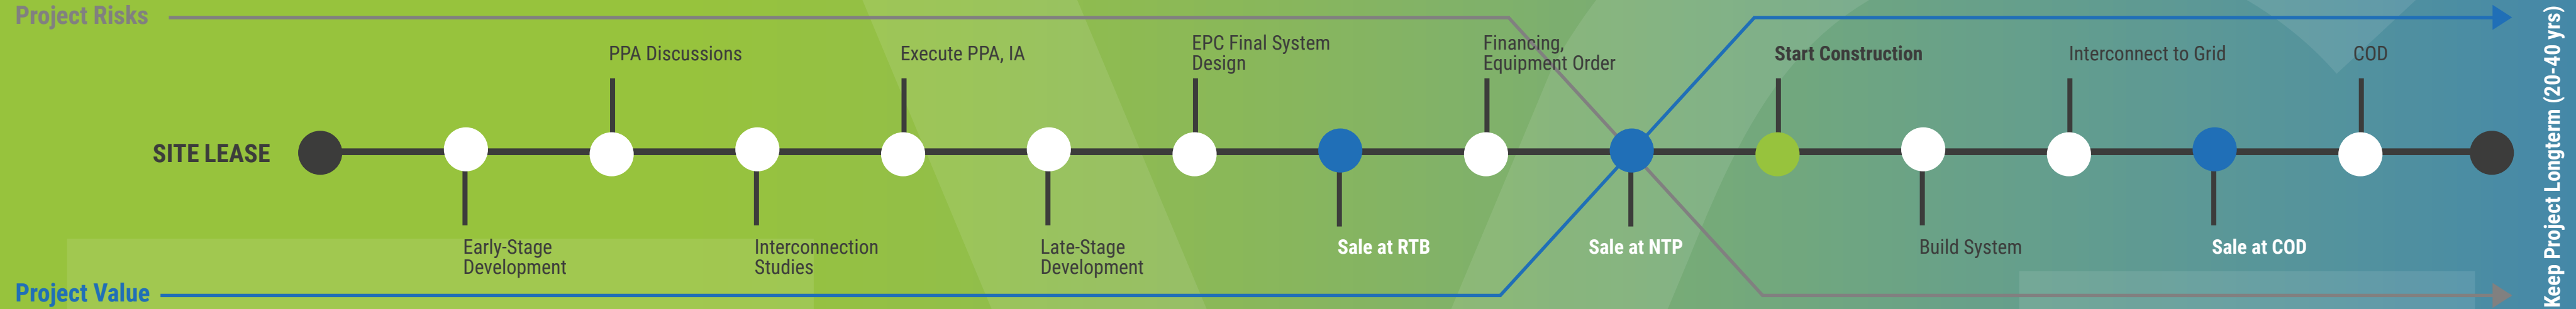

Our existing Projects

FVG at a Glance

A Well Thought Through Organization.

Our Lead

What We Do

NTP / RTB Sale

Develop and sell projects at "Notice To Proceed" or "Ready to Build" stage, so to maximize the profit margins and avoid EPC related risks.

COD Sale

Develop then build projects and sell the projects at "Commercial Operation."

Light IPP Business

Own and operate solar projects and receive the revenue from the sale of the electricity under PPAs (Power Purchase Agreement) and EMCs (Energy Management Contracts).

How We Do It

Social Policies

- Supplier Management Policy (SQE)
- Privacy Policy
- Group Procurement Management Policy
- Acquisition and Development Management Policy

Governance Policies

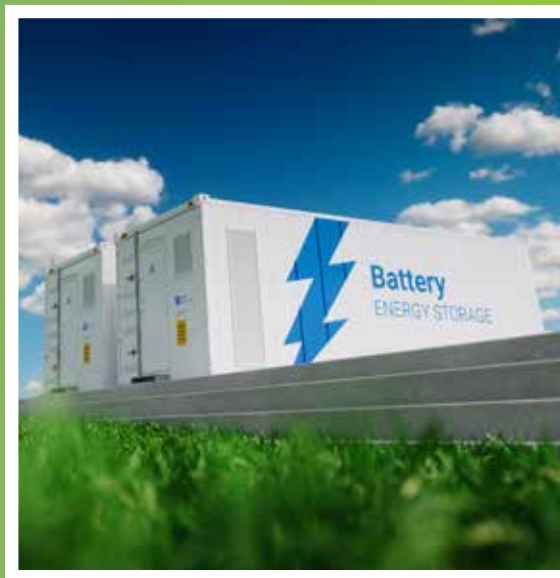

- Code of Business Conduct and Ethics
- Whistleblower Policy
- Health & Safety Policy
- Equal Employment Opportunity Policy
- Anti-Fraud and Reporting Mechanism
- Harassment-Free Work Environment Policy
- Information Management and Confidentiality Policy
- Related-Party Transaction Management Procedure
- Internal Audit Policy

Sustainability

What soes ESG mean to us?

Our Impact

A 360 Degrees View on our Planet

Actions beyond our clean energy business

Funding companies, NGO's and associations active in mitigating the climate change.

Supply Chain Control

Zero tolerance policy for any form of modern slavery or forced labor.

Gender Equality

57% of our team and 67% of the Steering Committee are women.

Provide Affordable and Clean Energy

Investing in innovating technologies to dramatically reduce the carbon footprint.

Preservation of protected areas and landscapes

Through a rigorous selection of the sites.

Empowerment of local communities

Creating jobs and raising awareness on the benefits of solar energy.

SUSTAINABLE DEVELOPMENT GOALS

Environmental

Our Commitment for the Generations Ahead.

Emissions

We participate in the Carbon Disclosure Project (CDP) under the Climate Change Initiative. FVG Renewables is committed to reducing the company's operational impact by digitalizing office operations, and implementing best practices among our staff.

Biodiversity Conservation

Our landscape designs are consistent with slope and ground protection standards. For all projects, we strive not to affect any endangered species and avoid development that could occupy any wetlands.

Energy

To guarantee the safe, efficient, and continuous operation of distributed PV power plants and power supply to the grid, we launched the distributed PV power plant centralized control center monitoring system.

Waste

According to the principles of source control and process supervision and treatment, we have integrated responsible waste management into the entire process of project construction and office operations.

Supply Chain Management

By incorporating due diligence at every step in our value chain, we hold our suppliers accountable in terms of their environmental and social impacts, product and/or service quality, and business ethics.

Social

Because Our Community Matters.

Health & Safety

We established our Occupational Health and Safety framework in accordance with OHSAS 18001. All our Business Units are responsible for employee safety and health, from the project level to the operational level.

Diversity & Inclusion

Recruitment, pay scale, and promotion are based on the qualifications, capabilities, skills, and potential of candidates. We aim to provide an inclusive, equal, active, and discrimination-free working environment for all our employees.

Community Investing

FVG Renewables has been an active participant in China's Government Poverty Alleviation Projects since 2017. To avoid adverse impacts to historical sites with cultural values due to our project development, we follow all required procedures. While bringing clean energy to the local community, we want to avoid and reduce risks and impacts at the social level by maintaining good relationships and communications with the community.

Empowering Our People

Our remuneration policy is consistent with effective risk management, and compensation is aligned with all local labor laws and regulations. We encourage and incentivize our employees to fulfill their career goals at all levels. We have implemented an annual performance review system, which combines KPIs/Goals, constructive feedback, and training and development.

Governance

A State-of-the-Art "Checks & Balance" in Everything We Do.

Policies & Procedures

Our policies and procedures ensure we cover all commitments important to FVG Renewables, and compliance throughout the organization.

Risk Management

Our risk management strategy is authorized and supervised by the Audit Committee and is conducted by the Internal Audit and Internal Control Department.

Legal Compliance

We have a long-standing commitment to conduct our business in compliance with applicable laws and regulations, in line with our culture of integrity, collaboration, and accountability. We also introduced specialized trainings to suit all the different and complex aspects of our operations.

Internal Controls

To reasonably ensure the efficiency of operations, compliance with laws and regulations, and the reliability of financial reporting, we established an internal control system according to the FCPA and SOX standards.
